Summary

Entry-level Data Analyst with hands-on experience in Python, SQL, Excel, and Power BI through academic projects and a Data & Machine Learning internship. Experienced in cleaning and analyzing datasets, performing EDA, creating visualizations, and building dashboards to understand trends and business performance. Strong foundation in statistical analysis and data-driven problem solving, with an interest in turning raw data into clear and useful insights.

Education

Government Engineering College, Palanpur, Gujarat **Jul 2024 – Jun 2027**
Bachelor of Engineering in Computer Engineering

Government Polytechnic College, Daman **Jun 2021 – Jun 2024**
Diploma in Computer Science Engineering

Skills

- **Data Analysis:** Data Cleaning, EDA, Statistical Analysis
- **Programming:** Python, SQL
- **Visualization:** Power BI, Tableau
- **Excel:** Power Query, PivotTables, Power Pivot, XLOOKUP, INDEX-MATCH
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** MySQL, PostgreSQL
- **Tools:** Jupyter, Anaconda, VS Code, Git, GitHub, Jira, Google Colab

Internship Experience

NATIONAL INSTITUTE OF ELECTRONICS & INFORMATION TECHNOLOGY (NIELIT) *Sep 2022 – Oct 2022*
Data and Machine Learning Intern

- Worked with Python, Pandas, and NumPy to clean, organize, and explore datasets, identifying patterns and preparing data for analysis and machine learning tasks.
- Performed exploratory data analysis by examining distributions, missing values, outliers, and relationships between variables to understand underlying data patterns.
- Created charts and visualizations using Python libraries to communicate trends and findings, making analytical results easier to interpret and present.
- Used Scikit-learn and basic statistical techniques to build and evaluate predictive models, comparing model performance using appropriate evaluation metrics.

Projects

Banking Transaction & Fraud Analysis | *SQL* | *Python* | *Pandas* | *NumPy* | *MySQL*

- Analyzed 50K+ banking transactions using SQL and Python to examine transaction volumes, customer spending patterns, account activity, and potentially unusual transactions.
- Applied statistical analysis and transaction-level features to identify high-value and anomalous transaction patterns across customer and transaction segments.

Super Store Sales & Profitability Dashboard | *Power BI* | *Power Query* | *DAX* | *Data Modeling*

- Transformed and modeled SuperStore sales data using Power Query and Power BI to analyze $1.6M in sales, 22K+ units, $175K in profit, and regional/category performance.
- Developed an interactive dashboard with DAX measures, sales trends, state-level analysis, and a 15- day sales forecast to monitor business performance.

Supply Chain Inventory & Demand Analytics | *Power BI* | *DAX* | *Power Pivot* | *Forecasting*

- Analyzed 10K+ inventory and shipment records to track stock levels, inventory turnover, supplier lead times, delivery performance, and product demand.
- Built a Power BI dashboard with 10+ DAX measures and demand forecasts to monitor stockout risks, slow-moving SKUs, and inventory performance.

Healthcare Hospital Operations Analytics| *Excel* | *Power Query* | *PivotTables* | *Statistics*

- Cleaned and transformed 20K+ hospital appointment records using Power Query to analyze patient visits, waiting times, cancellations, and department workloads.
- Used PivotTables and statistical analysis to compare average wait times, cancellation rates, and monthly appointment volumes across departments.

Certifications

- Deloitte Data Analytics Job Simulation through Forage!
- Data Visualisation: Empowering Business with Effective Insights job simulation with Forage! – Tata
- Microsoft Excel Beginners to Advance – Skill Course
- 30 days Power BI Micro course – Skill Course
